& ATKINSON WALKER (SAWS)

Industrial Quality Circular Saw Blades

Soft Wood Ripping

Hard Wood Ripping

STRAIGHT LINE EDGING

Application - Straight Line Edging - Extra thick thickness - 2" Hole and Pin Hole
Material - Solid Timber
Machine - Straight Line Edging

Dia (mm)	No. of Teeth	Body/Kerf (mm)	Stock Ref.	List Price
400mm	34	2.8/4.0	T1634 SLE	137.511
430mm	34	3.0/4.2	T1734 SLE	161.997
450mm	34	3.0/4.2	T1834SLE	160.501

2" hole, 17/32" pinhole @ 2.1/2" cts. fitted as standard

MULTI RIP

Application - Multi - Ripping - Carbide Tipped Wiper Slots
Rigid blade body
Material - Solid Timber
Machine - Multi Rip Saws - Splitting Saw

Dia (mm)	No. of Teeth	Body/Kerf (mm)	Stock Ref.	List Price
300mm	24	2.4/3.6	T1220MR	£136.74
350mm	30	2.6/3.6	T1424MR	£152.85

Available with 2.1/2" & 70mm bores and keyways

Any size made to order against specific blade specification, dependant on individual application.

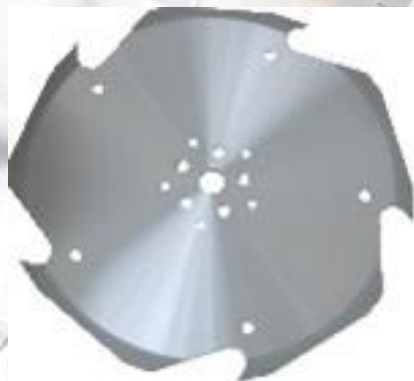

LUCAS SAW BLADE

Application - Ripping along the grain

Material - Solid Timber
Machine - Lucas frame saw

Dia (mm)	No. of Teeth	Body/Kerf (mm)	Stock Ref.	List Price
545mm	30	3.2/5.7	XTC2169	P.O.A.

**5 x 11mm counter sunk pin holes @ 88mm PCD
5 x 8mm pin holes @ 124mm PCD**

The Special All Purpose Saw

Designed to work at 50% of the R.P.M. of conventional wood working saws. This variety of blade is the most versatile on the market

Giving the end user the option to use just the one saw where carrying multiple saws is impractical.

Improved cutting when used with lubrication. Such as Interflon our recommended multi-functional lubricant available from stock

Made to suit the Craftsmen and D.I.Y worker alike.

Tried and trusted for over 20 years.

SHEFFIELD INDUSTRIAL SAWS

SIS

& ATKINSON WALKER (SAWS)

Thin Kerf Circular Saw Blades

MAXIMA Range

Tube & Pipe Cutting

Advantages

Completely new TCT and Cermet-metals, with extremely re-fined microstructures and higher toughness (less brittle).

Customized geometric designs to the custom materials.

Coatings minimize friction, reduce temperature and thus increase tool life.

Special pre-treatment of the cut edges makes the coating extremely durable

Exceptional blade bodies with extremely low side impact and high material tension.

Production process almost without straightening the blade body.

SIS
**SHEFFIELD
INDUSTRIAL SAWS**

& ATKINSON WALKER (SAWS)

Industrial Quality Circular Saw Blades

The New Face Of Log Saws

Only the highest specification raw materials (High Carbon, High Chrome, D2 high alloy steels) from Germany are used in the manufacturing of our blades. With a blend of experienced traditional craftsmen and modern working practices it allows SIS to control the quality from start to finish. All our blades are roller tensioned and our hand Smithers finish our blades to the highest industry standards. All SIS log saws are protected for safety and to ensure their quality until they are ready to install.

We also manufacture log saws with a variety of coatings to aid lubrication, reduce contamination, and improve cut life. This also removes the need to purchase costly lubrication.

With a wide range of diameters and specifications SIS can supply saws and blades for a variety of machines and applications ranging from 220mm to 1000mm.

The correct choice of saw is paramount and we manufacture the 228mm (9") bevel blades, 190mm (7 1/2") bevel and upon request we can also offer a universal intermediate blade at 210mm (8 1/4") bevel. All with standard bore sizes and pin holes to fit all major OEM log saw machines.
